FOREWORD

This bulletin contains county estimates of all cattle, all beef cattle, beef cows, and milk cows on farms January 1, 1976 - 1981, all hogs and pigs on farms December 1, 1975 - 1980, and all chickens on farms December 1, 1975 - 1980. Also included are estimates of broilers raised, milk production, egg production, and value of milk, egg and broiler production for the years 1975-1980.

This bulletin, prepared by the South Carolina Crop and Livestock Reporting Service, is a cooperative effort between the Economics and Statistics Service, United States Department of Agriculture, and the Department of Agricultural Economics and Rural Sociology and South Carolina Agricultural Experiment Station of Clemson University. This cooperative relationship helps promote economy and efficiency by avoiding duplication of effort and conflicting reports. The Federal program serves to provide comparable statistics for all states, which are released in scheduled national reports, while State funds make it possible to prepare and publish more detailed statistics for South Carolina such as presented in this Bulletin.

The South Carolina Agricultural Experiment Station is a cooperative program financed from federal and state funds. It is the policy of the Experiment Station to comply fully with the regulations of Title VI, the Civil Rights Act of 1964. Complaints may be filed with the Director, S. C. Agricultural Experiment Station, Clemson University, Clemson, S. C. 29631.

SOUTH CAROLINA LIVESTOCK REVIEW 1975 - 1980

By McCager Thompson

The South Carolina Crop and Livestock Reporting Service revises its livestock statistics every five years based in part on the statistics published in the quinquennial U.S. Census of Agriculture. This review relates to the 1978 Census. The Census has proven to be a reliable benchmark to which we could compare our annual statistics for historic trends. The following is a brief overview of the statistics involved in the Census review period of 1975 through 1979.

The Cattle Industry in South Carolina realized a decrease in inventory numbers during the Census period. The Census measured a 15 percent reduction in all cattle and calf numbers dropping from 589,827 in 1974 to 503,353 in 1978. We measured a 19 percent reduction during the comparable span of January 1, 1975 with 710,000 to January 1, 1979 with 575,000 head. This overall downward trend actually showed an increase for two years followed by the decrease for two years. There were 22,000 cattle farms in South Carolina in 1975 and 21,000 in 1979.

The number of milk cows, which includes any breed milked for home use or sale, decreased steadily during 1976 to 1980. Milk production, which is mainly production by commercial dairies, did not follow the trend of milk cow numbers because of the increased productivity of South Carolina's dairies. During the span 1976 - 1980, the milk produced per cow increased in all but one year and milk production followed an increasing trend even though there were less milk cows. The Census measured a 3 percent decrease in milk cow numbers during the span 1974 to 1978 with 47,718 and 46,246 respectively. We measured a 14 percent decrease with 59,000 milk cows on farms January 1, 1975 to 51,000 on farms January 1, 1979. There were 3,700 farms with one or more milk cows in 1975 and 2,800 in 1979.

The Hog and Pig Industry in South Carolina has been the hardest to reconcile when comparing the Census data to our estimates. The Census measured a 50 percent increase in hog numbers during the span 1974 to 1978 with 345,282 and 518,110 respectively. We measured a 9 percent increase with 480,000 in 1974 to 525,000 in 1978. The large difference in percent change between the Census and our statistics has actually brought the two figures quite close. Revisions at the county level were required for years in the Census period in order to follow the Census county data. The trend of inventory numbers during this period and on into 1980 has been one of an increased inventory, with only 1976 showing a slight decrease from the previous year. There were 18,000 hog farms in 1975 and 20,000 in 1979.

South Carolina Poultry producers have kept up a steady pace of increased annual inventories during the 1975 - 1980 period with only two years of decreased inventories, in 1976 and 1980. The daily rate of lay increased from 65.5 percent in 1975 to 68.5 percent for 1979 with 1980 showing a slight decrease to 67.7 percent. There were 7,400 farms with chickens in 1975 and 7,000 in 1979.

The Broiler Industry in South Carolina produced more broilers each year during the 1975 - 1980 period with the exception of 1980. The Census measured a 52 percent increase in broilers produced during the period 1974 to 1978 with 20,674,000 and 31,364,000 respectively. We measured a 26 percent increase for the same period with 31,552,000 and 39,695,000 broilers respectively. We believe our statistics accurately reflect the broiler industry in South Carolina as we contact all broiler contractors.

1981 CALENDAR OF CROP REPORTING BOARD RELEASES

<i>Nature of Report</i>	<i>Approximate Release Date</i>	<i>Frequency of Report</i>
CROPS:		
Annual Crop Summary	January 15	Annually
Fall Sowings, Wheat and Rye	December 22	Annually
Prospective Plantings	January 21, April 16	Annually
Acreage and Production Reports:		
Grain, Hay Crops, Sweetpotatoes and Tobacco	10th of month, during growing season	Monthly
Soybeans, Peanuts	10th of month, August - November	Aug.-Nov.
Cotton	10th of month, August - December	Aug.-Dec.
Seed Crops--Production Forecasts:		
Lespedeza	January 12	Annually
Grain Stocks	26th of Jan., April, June, Oct.	Quarterly
Peaches	10th of month, May - September	May-Sept.
Apples	10th of month, July	July
Pecans	10th of Sept., Oct., Dec.	Sept.-Dec.
Vegetables, Fresh Market	8th of April, July, October	Quarterly
	December 21	Annually
LIVESTOCK AND POULTRY:		
Turkeys: Breeder Hens, Dec. 1; Number Raised	January 8	Annually
Honey	January 15	Annually
Cattle on Farms and Values, Jan. 1; Calf Crop	January 30	Annually
Chickens (Including Broilers):		
Production, Disposition and Income	April 6	Annually
Meat Animals: Production, Disposition and Income	April 1	Annually
Milk: Production, Disposition and Income	May 22	Annually
Hogs on Farms, June 1; Pig Crop, Dec. - May	June 22	Annually
Hogs on Farms, Dec. 1; Pig Crop, June - Nov.	December 22	Annually
Broiler Chick Report	Wednesday of each week	Weekly
Milk Production	12th of month	Quarterly
Egg Production, Number of Layers, Hatchery Production	20th of each month	Monthly
Livestock Slaughter	20th of each month	Monthly
PRICE REPORTS:		
Mid-Month Average Prices and Parity Ratio	30th of each month	Monthly
MISCELLANEOUS:		
Farm Labor and Wage Rates	25th of Feb., May, Aug., Nov.	Quarterly
Crop-Weather Report	Mon. of each week, April-November	Weekly
Commercial Fertilizers	April 29 and November 3	Semiannually
